OVERALL WIDTH (D)	138.69	138.69	146.91
OVERALL LENGTH (E)	264	264	263
OVERALL HEIGHT (F)	126.5	126.5	150.25
CONVEYOR REACH (G)	36.69	36.69	44.91
CONVEYOR HEIGHT (H)	24	24	22.5
TRANSPORT WIDTH (J)	108.69	108.69	106.13
SPECIFICATIONS			
HP REQUIREMENTS	150*	150*	150*
RPM	540 OR 1000		
WEIGHT (lbs)	6850	7025	7525
ROLLERMILL CORN	6.5 GROOVES PER INCH		
DRY CORN	**2700 bushels per hour		
HI-MOISTURE CORN	**2400 bushels per hour		

BAGBOOM AND CRADLE ARE STANDARD
OPTIONAL EQUIPMENT - ROLLER MILL, SHELL CORN KIT,
SELF CONTAINED HYDRAULICS, GRAIN HOPPER
*80HP DRIVE OPTION
**CAPACITIES WILL VARY DEPENDING ON MOISTURE.

Always BLUE

Sioux Automation Center, Inc. (SAC) is an original equipment manufacturer based in Sioux Center, IA. SAC was established in 1961 with the goal of serving local customers through the manufacture, sale and repair of livestock equipment. Since then, SAC has grown to become a global leader in the agricultural and service equipment industries with the commitment of providing the highest quality products at an exceptional value. Today, SAC offers a diverse portfolio of ag equipment including: Maxi-Mixer and Turbo-Max TMR Mixers, Roto-Press Silage Baggers, Dry Manure Spreaders, Roto-Mill Roller Mills, and service equipment including Eagle Pro Service Trucks, and Tiger Cranes.

SAC also offers a full complement of services to support its products. Agricultural equipment services include mixer repair & rebuilding, scale sales & repair, mixer & scale loaners, on farm mixer repair, and an extensive inventory of parts that are available 24/7/365. Manure spreader, bagger and roller mill rentals are also available. Experience the SAC difference and give us a call with all your equipment needs today!

ROTO-PRESS

THE ROTO-PRESS ADVANTAGE

The ROTO-PRESS bagging system offers an extremely effective way to store crops, compared to expensive permanent silos and bunkers as well as preventing nutrient loss that occurs in bales, stacks or pits. The ROTO-PRESS offers true versatility by bagging anything from forages to by products to simultaneously rolling and bagging shell corn. The ROTO-PRESS offers simple setup and operation, few moving parts and ease of transportation.

FAST, VERSATILE, ECONOMICAL, UNLIMITED STORAGE That is ROTO-PRESS by SAC.

896 | 8' & 9'

1096 | 10'

Exclusive Auger Design
Axial flow, even compaction, reduced hp.

Braking System
Simple brand style braking system is used to achieve compaction.

Intake Conveyor
Hydraulically driven 52" side load conveyor, one of the widest in the industry.

Grain Hopper
6' x 9' hopper for rapid in-field bagging.

Bolt On Tunnels
Easily change between an 8 or 9 foot tunnel.

Fold In Towing Lights
Lights are standard on all units.

Fully Enclosed Oil Bath
Heavy duty double 100 roller chain drive.

Brake Assist Aids
Braking when ground conditions are poor.

Optional Shell Corn Kit
Available for 8,9 or 10 foot models, for grain storage.

ROTO-MILL SYSTEM

ROLL & BAG YOUR GRAIN

Remote Control
Swing auger from anywhere

Low Profile Hopper
Maximizing clearance

Large Drive Wheels
For difficult field conditions

High Torque Electric Motor
For powering through ruts
